PRICE LIST FALL-1945

EBERHARDT BLUEBERRY NURSERIES

Phone 9455

(Since 1924)

"Oldest and Largest in the West"

Route 1, Box 379

OLYMPIA, WASHINGTON

This price list cancels all previous quotations. Prices are subject to change without notice.

To our customers, past and present:
Please note that we have moved to a new location. Due to better soil we are now able to offer a much better blueberry stock than ever before.

We are growers of blueberries as well as blueberry plants, and offer only such plant stock as consistently in the past has borne good crops for us.

Description of Leading NAMED VARIETIES

Please Note—All nursery stock is pruned before leaving nursery and no pruning is necessary until after plants have born a crop.

VARIETIES

RANCOCAS—One of the best commercial varieties. Berries medium large, of good flavor, ripening in early July. Excellent shipping and freezing qualities as well as for table use. Very dependable cropper, and entire crop can be harvested in two pickings.

Bush—Sturdy grower and is very easily pruned. At maturity bush should reach height of 6 feet.

Medium Sized—2-year nursery grown, 10 to 14 inches tall, each.....40c

Large—2-year nursery grown, 12 to 18 inches tall, each.....50c

Large—3-year field grown, about 2 feet tall, heavy rooted, each.....60c

Large—4-year field grown, about 2½ feet tall, extra heavy rooted and well set with fruit buds for the coming season, each.....\$2.00

RUBEL—An old favorite of the commercial grower. Excellent as a canner, freezer and for home use. Its medium-sized berries ripen late in July and continue on into August. Bush reaches a height of over 6 feet and is easily pruned.

Medium sized—2-year nursery-grown, 10 to 14 inches tall, each.....40c

Large—2-year nursery grown, 12 to 18 inches tall, each.....50c

Large—3-year field grown, about 2 feet tall, heavy rooted, each.....60c

Large—4-year field grown, about 2½ feet tall, extra heavy rooted and well set with fruit buds for the coming season, each.....\$2.00

(Continued on Page 6)

Eberhardt Hybrid

Again This Season We Can Offer Our

These plants are hybrid crosses, the progeny of high quality parents such as D-4 X Atlantic, N-1410 X Jersey, B-322 X Pemberton and others.

All have borne the past two seasons a good crop of large luscious berries and we are of the honest opinion that they far excell any hybrids we have ben able to offer up to 1945.

They have from 3 to 5 stems before pruning, and range from 2½ ft. to 5 ft. in height, are heavy rooted, sturdy and well branched plants with ample fruit buds to warrant a fair crop of berries this coming season. Ripening season for these berries is from early July into September. These hybrids are sent out under one common label, "Hybrids" and orders will be made of different kinds to insure cross pollination.

These jumbo sized plants are ideal for field planting, can be used for hedge planting or in the home garden, as they produce both delicious berries and a riot of fall coloring.

The moderate prices for these plants are as follows:

4 yr. heavy field grown.....	\$1.50
5 yr. heavy field grown.....	\$2.00

We have a limited number of 3 yr. "Hybrids" at \$1.00 each.

Cutting wood-whips 14 inches to 20 inches long. 10 whips to the bundle. (Sold only in bundles of 10) Bundle.....\$1.00

Blueberry Plants

Outstanding "Hybrid" Blueberry Plants

Promising New Varieties

Pemberton—"Coville" Hybrid Katherine X Rubel. Vigorous and very productive bush. Berries larger than Rubel and of better flavor. Ripens middle of July.

2 yr. nursery grown	\$1.50
3 yr. field grown	\$2.50

B-322—Bush tall and broad. Berries larger than Atlantic or Pemberton, of good flavor and excellent shipping quality. The large crop of Jumbo sized berries which hang in immense clusters and are deep blue in color, combined with the striking fall color of its leaves makes this variety a valuable ornamental plant which should grace every garden.

2 yr. nursery grown.....	\$1.50
3 yr. field grown	\$2.50
4 yr. field grown	\$3.50

D-4—Eberhardt Hybrid, Pioneer X Grover. Bush grows tall, and is very vigorous. It produces a large leaf surface capable of nourishing its heavy crops of Giant sized berries, which are medium blue in color and one of the most delicious for eating fresh.

Ripening season early July. Clusters ripen evenly and entire crop can be harvested in two pickings. Second pick about two weeks after first one.

2 yr. nursery grown	\$2.00
3 yr. field grown	\$3.00
4 yr. heavy field grown with plenty of fruit buds	\$4.00

LEADING VARIETIES (from Page 3)

CONCORD—Berries large and of good flavor but somewhat acid unless allowed to hang on bush until fully ripened. Does not seem to have the keeping qualities for long distance shipping. An erect and tall grower. Pruning consists of eliminating the dense twiggy growth from center of bush.

Large—3-year field grown, about 2 feet tall, heavy rooted—each.....90c

Large—4-year field grown, about 2½ feet tall, extra heavy rooted and well set with fruit buds for the coming season—each.....\$2.75

STANLEY—Berries firm, medium large and of excellent flavor, ripening from middle of July into August. Good for both shipping and home use. Bush is tall, reaching a height of 7 feet at maturity, but not quite as vigorous as some other varieties

Large—3-year field grown, about 2 feet tall, heavy rooted—each.....90c

Large—4-year field grown, about 2½ feet tall, extra heavy rooted and well set with fruit buds for the coming season—each.....\$2.75

Large—5-year field grown, about 3 feet tall, heavy rooted—each.....\$3.25

JERSEY—The best late variety. Berries are large, of good flavor and stand up well in long distance shipping. Ripening season from early August into September. Bush exceptionally tall and vigorous grower and easily pruned.

Medium sized—2-year nursery grown, 10 to 14 inches tall—each.....60c

Large—2-year nursery grown, 12 to 14 inches tall—each.....70c

Large—3-year field grown, about 2 feet tall, heavy rooted—each.....90c

Large—4-year field grown, about 2½ feet tall, extra heavy rooted and well set with fruit buds for the coming season; ea.....\$2.75

CUTTING WOOD—Grover and Rancocas only. Whips about 14 inches long, 10 whips per bundle. (Not less than 10 whips per bundle of one variety.)
Per bundle\$1.00

To Home Gardeners and Commercial
Growers Wishing Quick Returns We
Offer the Following Varieties in

“Giant-Sized” Plants

RANCOCAS —Large 5-year field grown.....	\$2.75
RANCOCAS —Large 6-year field grown.....	\$3.75
Rubel —Large 5 yr. field grown.....	\$2.75
Rubel —Large 6 yr. field grown.....	\$3.75
Jersey —Large 5 yr. field grown.....	\$3.25
Jersey —Large 6 yr. field grown.....	\$4.00

These plants are from 3 to 5 ft. tall before pruning and have from 3 to 8 strong stems (depending on the variety) plus a heavy matted root system. All of them had a good crop of berries this past summer and are well set with fruit buds for the coming season. All plants will be properly pruned (ready for planting before leaving the nursery. These Giant Sized plants should bring quick returns to the commercial grower or would be ideal in the home garden. Approximate weight, 5 pounds per plant when packed for shipment. An extra charge of 20 cents per plant on 5 yr. size and 25 cents on 6 yr. size is made to handle shipping charges.

“HOME GARDEN” ASSORTMENT

4-5 yr. plants (our selection).....	\$5.00
-------------------------------------	--------

These plants range from 2½ to 5 ft. in height and are well set with fruit buds. From 4 to 6 root shoots for starting new plants will be given free with this order. Shipping charges about 15 cents per plant.

Notice to Customers

The following varieties not available this season:

ATLANTIC—"Coville" Hybrid, Pioneer X Jersey

N-1410—"Eberhardt" Hybrid, Pioneer X Rubel.

Weymouth—"Coville" Hybrid, Cabot X June.

Dixie—G M 37 X Stanley.

Shipping Charges and Sales Tax

(Washington customers please add 3% tax to your orders)

If more money is sent than is required for shipping charges, balance due you will be made up in extra plants. Shipping charges per plant on medium 2 yr. 2c, large 2 yr. 3c, 3 yr. 4c, and 15c on 4 yr.

Planting instructions are as follows:

Plants should be planted or heeled in upon arrival to prevent drying out. Root crown should be set well below surface of ground in ordinary soil and in wet places plant less deeply.

Stock of all varieties and sizes (excepting hybrids) is very low and we may have to substitute. When ordering kindly name a second choice.
